4. What level of experience do you have for using appropriate ideas?

5. What level of interesting do you have for learning how to present information?

6. What level of interesting do you have for learning how to present information?

Submit
Why important?

- Customize learning and adjust instruction based on learner’s performance at the moment of learning.
- Learners not only learn domain knowledge but also develop problem-solving skills, which are the most wanted skills by employers.
- Transfer novice learners to senior problem solvers.
- Supported by innovative technologies (e.g., learning analytics, virtual reality, mobile learning).
- It works for both online learning and traditional classroom learning.
- It is not limited to specific subject/content.
- Offer affordable high-quality customized education.
Contact me if you want to:

- Offer diverse learning experiences (both online and classroom learning)
- Improve novice employees’ performance and problem-solving skills
- Customize your education!
